PUBLIC NOTICE

Video Security System Installation at the First Nations Longhouse

The First Nations House of Learning has installed a video security system at the First Nations Longhouse for safety and investigative purposes.

Video cameras have been placed outside at the north, west, and south access doors to the Longhouse. The camera system is part of an overall security service provided by Campus Security, including 24/7 response, intrusion alarm and access control systems. The camera system has been implemented with other technology options, as an integrated system to provide a high level of security.

Please review the Terms of Use - First Nations Longhouse Camera System for more information, including privacy considerations.

For inquiries, contact Christine Wasiak, Longhouse Building Manager, First Nations House of Learning, cwasiak@fnhl.longhouse.ubc.ca.
